Rachel has a keen "world view".

## What a Wonderful World!

Students in Mrs. Rauschert's science class had an opportunity to experience "creating" their own earth models. They had to go through many steps to reach a point where their "world" was established and firm. Then came time to place continents in their proper places. Even with models near by, it was very challenging to put everything in the right location.

We should be amazed when looking at the wonders of this world. We see God's handiwork in all things. There is an order to things. There is beauty. And there is life. God gives us a creation which reflects His power in every bug, every snowflake and every sunset...not just a random floating orb.

Our world will never be perfect. Our sin took perfection away and stains our world. But we have been redeemed by the blood of the Lamb!
